

### **Summer 2021 Newsletter**

#### Dear Neighbors!

We know it's hot out there and it doesn't look like there is much relief in sight. Here are a few suggestions for beating the heat:

- 1. Drink a lot of water, and I mean A LOT! Electrolyte replacement is important too!
- 2. Avoid being outside in the sun between 1:00 6:00 pm
- 3. Dress appropriately. Cool clothing that wicks or cotton that dries quickly.
- 4. Freeze or refrigerate your bed sheets (do this for 30 minutes before going to bed) Hey, it can't hurt!
- 5. Cool down your hot zones. By pressing small ice packs or ice filled water bottles to your pressure points, you will experience immediate cool! Ankles, behind the knees, elbow bends, neck, temple.
- 6. Add some spice! Eating spicy foods will cause you to sweat which will cool you down!
- 7. Eat a popsicle or smoothie
- 8. Create a cooling station: fill a container with cool water to put your fee in it.
- 9. Eat more salad this keeps the stove and oven off!
